PROFESSIONAL SUMMARY

Backend-focused Computer Science undergraduate with hands-on experience in building scalable REST APIs using Node.js and Express. Strong understanding of database design, authentication systems, modular architecture, and performance optimization. Passionate about building production-ready backend systems with clean architecture and efficient data handling.

TECHNICAL SKILLS

- **Programming Languages**: Java, C++, Python, JavaScript (ES6+)
- **Backend & Frameworks:** Node.js, Express.js, REST APIs
- **Databases & Analytics:** MongoDB, MySQL
- **Caching & Search:** Redis (basic caching concepts), ElasticSearch (conceptual understanding)
- **Messaging Systems:** RabbitMQ (conceptual knowledge of async processing)
- **DevOps & Tools:** Docker (containerizing Node apps), Git, GitHub, Postman, CI/CD basics
- **Core Concepts**: OOP, DSA, DBMS, OS fundamentals, System Design basics, MVC architecture

PROJECTS

- **EventSphere - College Event Management System | MERN + Tailwind CSS**

  GitHub: - https://github.com/palak-26/EventSphere-College-Event-Management-System.git

  Live: - https://eventsphere-hu6d.onrender.com/

  - Designed and implemented modular REST APIs with role-based authentication (JWT).
  - Structured MongoDB schemas with indexing and optimized query performance.
  - Applied MVC architecture and middleware-based error handling.
  - Implemented pagination and efficient filtering for large event datasets.
  - Deployed backend using containerized setup and production-ready configuration.
  - Focused on scalable folder structure and maintainable codebase.

- **Expense Tracker | MERN + Tailwind CSS**

  GitHub:-https://github.com/palak-26/Expense-Tracker.git

  Live : - https://expense-tracker-frontend-8mul.onrender.com

  - Developed secure RESTful services with validation, authentication, and structured logging.
  - Designed normalized database schema for transaction management.
  - Implemented reusable service layers to separate business logic.
  - Handled asynchronous operations with proper error boundaries.
  - Performed API testing and debugging using Postman.

  (Other projects can be referred from portfolio website attached above)

EDUCATION

- **Baderia Global Institute of Engineering and Management, Jabalpur, MP**

  Bachelors of Technology (CSE) CGPA: -**8.19** **Nov- 2022 – June-2026**

- **Ashoka Hall Senior Secondary School, Jabalpur, MP**

  Higher Secondary XII (CBSE) Percentage: -**91.4%** **Apr- 2021 – Apr-2022**

  Matric X (CBSE) Percentage: -**90.8%** **Apr- 2019 – Apr-2020**

WORK EXPERIENCE

- **Front-End Developer Intern | Edunet Foundation – IBM SkillsBuild**
  - Integrated APIs with frontend and improved application performance.
  - Debugged production-level issues and improved component modularity.
- **Open Source Contributor | GirlScript Summer of Code 2025**
  - Contributed to **2+ open-source repositories**, resolving **10+ issues** related to bugs, refactoring, and feature enhancements.

ACHIEVEMENTS

- Smart India Hackathon 2024 Finalist of 400+ national teams.
- CoCubes Assessment Score: 710/800 (National Level Employability Assessment)
- 98.34 percentile – Naukri Campus Young Turks Assessment with AIR 8460.
- Winner – Web Development Quiz, GeeksforGeeks Campus among 100+ students participating.
- Treasurer, IEEE Student Chapter.
